4.1. Installing the Chrome Extension	2
4.2. Installing the Firefox Extension	3
4.3. Installing the Opera Extension	3

[Home](#) 🏠

[HowTos](#) 🗨️

[Labs](#) ☁️

1. Install Docker (Ubuntu)

<http://docs.swarmlab.io/Howtos/docker/install.adoc.html>

2. Install (swarmlab-adoc)

<https://git.swarmlab.io:3000/swarmlab/swarmlab-adoc>

3. Usage (swarmlab-adoc)

- Open a console
- Switch to the directory that contains *.adoc documents
- Call the AsciiDoctor processor with the swarmlab-adoc command

```
cd dir
swarmlab-adoc
```

swarmlab-adoc convert all *.adoc files recursively in html5 and pdf

If you need to convert only one file

```
docker run --rm -v $(pwd):/documents/  
registry.vlabs.uniwa.gr:5080/swarmlab-asciidoctor asciidoctor --safe -b  
html5 -a theme=flask -a toc2 -a toc-placement=right -o  
./path/to/FILENAME.html ./path/from/FILENAME.adoc
```

Please note, there is a . in ./path

4. Setup live preview Using a web browser

All you need to preview an AsciiDoc document in a web browser is to install

- the [Chrome extension](#)
- or the [Firefox add-on](#)
- or the [Opera extension](#)

Then you can see the AsciiDoc file rendered as HTML just by visiting it!

Live Preview

The screenshot displays two windows side-by-side. The left window is a terminal editor (gedit) showing the source AsciiDoc file 'asciidoc-for-newbies.ad'. The text in the terminal includes a title 'Why, then, do we struggle when writing "documents" (e.g., articles, wiki pages, documentation, books and the like)?', a paragraph about the challenges of writing technical documentation, a section header 'Using what works', and a section 'What if you could write documents just like you write an e-mail?'. The right window is a web browser showing the rendered HTML version of the document. The browser's address bar shows the file path. The rendered HTML includes the same title and paragraph, followed by the section 'Using what works' in red, and the section 'What if you could write documents just like you write an e-mail?' in bold. The rendered text is clean and readable, demonstrating the live preview functionality.

4.1. Installing the Chrome Extension

1. Download [asciidoctor-chrome-extension.nex](#)
2. Open chrome://extensions
3. Drag'n'drop the .nex file into the page to install

4.2. Installing the Firefox Extension

1. Download [asciidocctor-firefox-addon.xpi](#)
2. Open the file with Firefox to install

4.3. Installing the Opera Extension

1. Dowload [asciidocctor-chrome-extension.nex](#)
2. Open opera://extensions
3. Drag'n'drop the `.nex` file into the page to install

That's all folks! :-)

Reminder

Caminante, no hay camino,
se hace camino al andar.

Wanderer, there is no path,
the path is made by walking.

Antonio Machado Campos de Castilla
