Paragraphs don't require any special markup in AsciiDoc.  
A paragraph is just one or more lines of consecutive text.

To begin a new paragraph, separate it by at least one blank line.  
Newlines within a paragraph are not displayed.

A paragraph offset by at least one space becomes a literal paragraph.  
All lines in a literal paragraph must be adjacent.

A literal paragraph is displayed as preformatted text.  
The text is shown in a fixed-width font.  
Spaces and newlines,  
like the ones in this sentence,  
are preserved.

NOTE: An admonition paragraph draws the reader's attention to  
auxiliary information.  
Its purpose is determined by the label  
at the beginning of the paragraph.

Here are the other built-in admonition types:
