

git Intro !

Πίνακας περιεχομένων

1. clone from the Swarmlab repository	1
---	---

1. clone from the Swarmlab repository

To browse repos go to <https://git.swarmlab.io:3000> find a repo, click on HTTPS button and and copy URL

Make sure you have Git installed, you can check with:

```
$ git --version
```

Go to the directory you want to install repo into and clone the repository.

This example gets the **swarmlab-adoc** repo

```
$ mkdir myrepo  
$ cd myrepo  
$ git -c http.sslverify=false clone https://git.swarmlab.io:3000/swarmlab/swarmlab-  
adoc.git  
$ cd swarmlab-adoc
```

Read `INSTALL.md`

Reminder

Caminante, no hay camino,
se hace camino al andar.

Wanderer, there is no path,
the path is made by walking.

Antonio Machado Campos de Castilla
